

Deciduous and Semi-deciduous plants offer to the gardener a chance to note seasons, enjoy change and add depth and character to the garden. Placed among evergreen staples in a landscape design, you can create framed specimens of color, both in foliage and bark. California's deciduous species create dynamic gardens that hold interest year round. See our catalog for more information. [www.californianativeplants.com](http://www.californianativeplants.com)

GENUS SPECIES	PLANT NAME	DESCRIPTION
